## **INTRODUCTION**

SaskPower's ***Electric Service Requirements*** have been prepared to provide requirements for the connection of electrical service to SaskPower's facilities. The basic intent of these requirements is to ensure conformity to the Code, provide for protection of personnel and equipment, and recognize operational needs; while providing as many options as reasonable for the connection of electrical service to SaskPower's facilities.

For Non-Utility Generation requirements also refer to the following SaskPower documents, as applicable, which can be found at [www.saskpower.com](http://www.saskpower.com).

Generation Interconnection Requirements at Voltages 34.5 kV and Below, or  
Non-Utility Generation Interconnection Requirements at Voltages 72 kV and Above

SaskPower Electrical Inspections Division, by the authority of the Electrical Inspection Act for Saskatchewan and the Canadian Electrical Code, Part I, and Saskatchewan Amendments, has complete authority beyond the point of delivery.

In addition to Code requirements, the ***Electric Service Requirements*** cover SaskPower's requirements. If not followed, the service request may be refused as SaskPower has an obligation to ensure public safety and maintain service standardization.

Under certain circumstances, requests for deviations to the ***Electric Service Requirements*** are made to SaskPower by the consumer.

These requests must be made in writing and accompanied by drawings. And in order to be considered properly, these requests must be received well in advance of construction. If approval for a deviation is granted, it is only valid for the particular service in question, and is not a general approval for any future services. Typically the permission to deviate from the ***Electric Service Requirements*** for a specific instance is granted by the Region Engineering Supervisor or an equivalent position as it pertains to that specific department or Business Unit. However, Region Engineering Supervisors or equivalent positions do not have the authority to grant deviations to the ***Electric Service Requirements*** that are derived from and stated in the Canadian Electrical Code. Copies of all deviations are to be forwarded to the ***Electric Service Requirements*** Committee for review and record retention.

Also, requests for deviations to the ***Electric Service Requirements*** may come from SaskPower personnel. Requests for deviations to the ***Electric Service Requirements*** must be made in writing to the applicable SaskPower Customer Services office. In order for SaskPower to properly consider the request, it must be accompanied by drawings and must be received well in advance of construction. For contacts and telephone numbers, please see the Customer Services Area Map, as found near the end of Section 1. If approval for a deviation is granted by SaskPower, it is only valid for the particular service in question, and is not a general approval for any future services.

Suggestions for changes to the ***Electric Service Requirements*** must be made in writing, using the "Request For Change Form", and mailed or faxed directly to:

 **SaskPower**  
Metering Services,  
1600 1<sup>st</sup> Avenue,  
Regina, Saskatchewan  
S4R 8G5  
Fax: (306) 566-2265

The members of the Electric Service Requirements Review Committee are:

<b>Section 1 and Section 2:</b>	P. Buettner L. Crookshanks M. Ereth G. HageI C. Kenney M. Mamona K. Smith	Region Engineering, Transmission & Distribution Metering Services, Customer Services Lines & Stations, Transmission & Distribution Operating, Transmission & Distribution Electrical Inspections, Transmission & Distribution Customer Development and Support, Customer Services Business Policy, Customer Services
<b>Section 3:</b>	N. Thomson	Network Development, Planning, Environment & Regulatory Affairs
<b>Section 4:</b>	M. Ereth B. Fuchs G. Podborochynski L. Crookshanks	Lines & Stations, Transmission & Distribution Lines & Stations, Transmission & Distribution Lines & Stations, Transmission & Distribution Metering Services, Customer Services

**A copy of SaskPower's *Electric Service Requirements* is available on SaskPower's website:**

**[www.saskpower.com](http://www.saskpower.com)**

**Updates are posted periodically. Please refer to the documents on [www.saskpower.com](http://www.saskpower.com) for the most up to date version.**
