The mandate of the Corporation is to operate a greenhouse to provide tree seedlings for the purpose of afforestation. 2. Summary of Significant Accounting Policies

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles. The following accounting policies are considered significant:

(a) Use of Estimates

The timely preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Such estimates primarily relate to unsettled transactions and events as of the date of the financial statements. Actual results could differ from those estimates which may impact the actual results reported in future periods.

(b) Inventory

Inventory is valued at the lower of cost or net realizable value with the cost being determined on a first-in, first-out basis.

(c) Property, Plant and Equipment

Property, plant and equipment is recorded at cost. Depreciation is calculated on a straight-line basis, at average rates calculated to amortize the cost of the property, plant and equipment to their estimated salvage value as set out below:

Buildings	2.5%
Equipment and furniture	14.0%

(d) Revenue Recognition

Contract revenue earned is based on total expenses incurred during the year.
