

Rate Review Process

The Saskatchewan Rate Review Panel and Crown Investments Corporation of Saskatchewan have been invited to monitor and participate in the review. The public is also invited to participate. An independent consultant, Elenchus, has been selected to lead the COS review. Elenchus will be responsible for reviewing all aspects of our existing methodology and benchmarking our practices against other electrical utilities.

After a review, including consideration of public input, Elenchus will provide a report outlining its recommendations. A copy of the report will be made available on this webpage. SaskPower will study all recommendations from the consultant and study the impact of each recommendation on SaskPower and its customer classes. Any material changes to our company's COS methodology will be submitted as part of a future rate application and will be subject to a Saskatchewan Rate Review Panel review and Government of Saskatchewan Cabinet approval.

The Process:

- Cost of services kick off meeting
- Elenchus provides preliminary update of review of SaskPower's cost of service methodology
- Elenchus presents draft response and its findings and invited written submissions
- Elenchus provides a final report which includes all written questions and a response to stakeholder submissions
