

# Electrical Service Changes

## SERVICE REQUEST

If you need to make changes to your electrical service – we can help.

Changes could include:

- Relocating farmyard power lines
- Overhead to underground conversion
- Relocation of transformer/service point
- Relocation of existing underground facilities
- Requesting farm standby power centre

### 1. Apply

Contact us online or by phone to apply. We'll need a site plan with your request that pin points the area you're planning on changing. Please explain in detail the changes you'd like to make in the comments section. You'll get a notification number after submitting your request. Keep it handy for a reference.

### 2. Verbal Quote (1-7 days)

For simple designs, we'll provide a verbal quote. Designs that are more complicated will need a formal design before the field check.

After giving you a formal quote, we'll complete a site check. If you decided to proceed, we'll give you a formal quote.

### 3. Design (7-14 days)

We may ask you for more details to better understand your request. Once we're done with the design, we'll have you review it as part of the written quote.

After you've approved it, changes made to the design may result in extra charges. It'll also change the construction schedule.

Changes that are simpler may be processed faster. Our personnel will contact you and give you a verbal quote.

If changes are more complicated or have safety concerns, we'll contact you. Our personnel will go over timelines and precautions.

### 4. Written Quote (2 days)

You'll get a written quote along with all the paper work you'll need to sign. To stay on schedule, please sign them and get them back as soon as you can.

### 6. Confirmation

You have 60 days to confirm the quotes.

We need confirmation in writing as well as any down payment that's stated. We'll also need you to confirm the timeline and the date your site will be ready for construction. To stay on schedule, we suggest contacting your electrician for the electrical permit.

### 7. Land Approvals (10-30+ days)

Before we start, we need to secure land approvals. We'll work with municipalities, third parties and other utilities services. We do everything we can to secure land approvals, but we cannot guarantee anything. All approvals must be in place before construction. All timelines for approvals vary.

### 8. Construction (10-30+ days)

We're ready to get to work! We've called Sask 1st Call, received the materials and scheduled the crew. When we're done, you'll get an invoice for the construction charges.

Start the process today! [Apply now!](#)
