

ELECTRICAL SERVICE REQUESTS

URBAN RESIDENTIAL

Building a new home or making changes to your electrical service?

Within some established communities, service requests will follow four simple steps: apply, confirm site readiness, construction and power connection. Understanding the process and applying early can help keep your project moving.

1. APPLY

Review the Service Application Checklist and submit your application as early as possible. Before work can begin, you'll need to:

- Complete all application requirements.
- Accept your quote (provided by phone or email).
- Ensure your site is ready for construction.

Information Sharing with SaskEnergy

For single-family or semi-detached homes in a city, town or village, we'll share your application with SaskEnergy. If your project is in a rural municipality, resort community or First Nation community, you'll need to apply directly with SaskEnergy. Please visit www.saskenergy.com to get started.

SaskPower, SaskEnergy and telephone/internet providers coordinate joint trenching in the following communities:

- | | |
|----------------|----------------|
| • Saskatoon | • Regina |
| • Warman | • Emerald Park |
| • Dalmeny | • White City |
| • Martensville | • Pilot Butte |

2. SITE READINESS CHECK

A SaskPower representative will visit your site to confirm it is ready for service installation.

If the site's not ready, a SaskPower representative will contact you. They'll confirm with you what's needed to be site ready.

If the site's ready, we'll schedule the work and move your project into construction.

3. CONSTRUCTION

Once your site is ready, we'll complete the electrical service work.

New service installation:

We aim to complete the work within 10 business days of confirming site readiness.

Service changes or relocations:

We aim to complete the work within 14 business days of confirming site readiness.

4. ENERGIZATION

Before power can be connected, we'll need:

- Electrical permit number
- Electrician information
- Confirmation the energization sticker is placed on the meter socket.

Once we receive this information, we'll energize your service.

To obtain more information or to submit an application please visit www.saskpower.com/NewConnects
